BUSINESS PROCESS SPECIALIST

Senior IT & ERP Professional with 14+ years of experience across enterprise systems, ERP implementation, IT operations, business process analysis, system integration, and manufacturing environments. Experienced in managing cross-functional IT projects, translating business requirements into system solutions, coordinating vendors and stakeholders, and leading end-to-end system implementation and operational improvement. Strong hands-on background in Oracle EBS, SQL/PLSQL, data integration, ERP data validation and reconciliation, with proven experience supporting manufacturing business processes and enterprise system integration. Experienced in bridging business and technical teams to deliver practical, reliable, and sustainable IT solutions.

LEADERSHIP STRENGTHS

- A business-oriented ERP and IT professional with strong analytical and critical-thinking capabilities, experienced in supporting enterprise applications, improving business processes, and delivering practical technology solutions aligned with organizational objectives.
- Experienced in Oracle E-Business Suite (EBS), IT Asset Management (ITAM), Software Asset Management (SAM), and enterprise application support, with a solid understanding of Procurement, Inventory, Warehouse, Fixed Assets, and Finance business processes.
- Skilled in stakeholder engagement and cross-functional coordination, effectively collaborating with Finance, Procurement, Warehouse, HR, vendors, and management teams to resolve business and system-related challenges.
- Proven capability in IT governance, policy development, SOP creation, compliance support, and audit readiness initiatives to strengthen operational controls and standardization.
- Strong problem-solving and service delivery mindset, utilizing root-cause analysis and continuous improvement approaches to enhance operational efficiency and user satisfaction.
- Experienced in application enhancement initiatives, workflow automation, requirement analysis, testing coordination, and business process improvement activities across enterprise systems.
- Effective communicator, trainer, and knowledge-sharing advocate with the ability to translate technical concepts into business language and support user adoption of technology solutions.
- International exposure across Germany, Canada, Kazakhstan, and Malaysia, with experience working in multicultural and geographically distributed business environments.

CORE EXPERTISE

| ○ Procurement, Inventory & Warehouse Operations | ○ Workflow Automation & Process Optimization | ○ Application Testing & User Acceptance Testing (UAT) |
| ○ Finance & Asset Management Processes | ○ Incident, Problem & Change Management | ○ Cross-Functional Collaboration |
| ○ IT Asset Management (ITAM) | ○ Root Cause Analysis & Troubleshooting | ○ Knowledge Transfer, Coaching & User Training |
| ○ Software Asset Management (SAM) | ○ Stakeholder & Vendor Coordination | ○ International & Multicultural Working Environment |
| ○ IT Governance & Compliance | | |
| ○ Policy, SOP & Process Documentation | | |

TECHNICAL & FUNCTIONAL EXPERTISE

- | Enterprise Applications | IT Governance & Asset Management | Development | Tools & Platforms |
|---|-----------------------------------|-------------------------|--------------------|
| ✓ Oracle E-Business Suite (Inventory, Purchasing, Fixed Assets, General Ledger) | ✓ IT Asset Management (ITAM) | ✓ C# / .NET Core | ✓ Visual Studio |
| ✓ HRIS | ✓ Software Asset Management (SAM) | ✓ VB.Net | ✓ DevExpress |
| ✓ BPM Workflow Systems | ✓ Policy & SOP Development | ✓ Rest API | ✓ Git, TortoiseSVN |
| ✓ GLPI IT Asset Management | ✓ Audit & Compliance Support | ✓ OOP | ✓ Jira, Notion |
| | | ✓ Design Pattern | ✓ Draw.io |
| | | ✓ Microservice concepts | ✓ Confluence |

PROFESSIONAL EXPERIENCE

Senior IT Supervisor

PT. Trina Mas Agra Indonesia, Kendal, Indonesia (May 2025 – Present)

Achievements:

- ✓ Managed IT coordination for an integrated manufacturing environment with Oracle ERP as the core ERP, connected with WMS, BPM, and internal corporate web applications.
- ✓ Coordinated Oracle ERP → IT Inventory → ETL → Host-to-Host → DJBC/INSW integration, ensuring transaction and master data alignment with customs requirements.
- ✓ Validated end-to-end Goods Receipt → BOM Issue → MRO Issue → WIP Process → Waste/Scrap → Finish Good → INSW processes, including master data, transaction reconciliation, and material traceability.
- ✓ Managed IT coordination for HRIS implementation, including requirements, vendor delivery, testing, training, issue resolution, milestone validation, and Go-Live planning.
- ✓ Supported enterprise applications and IT operations across Windows/Linux, databases, networks, access control, and vendor services, providing technical analysis and business-user support.

Key Profile:

- ✓ Senior IT professional managing ERP, enterprise applications, manufacturing systems, and IT operations within a manufacturing environment.
- ✓ Experienced in business process analysis, system implementation, integration, data validation, and cross-functional IT coordination.
- ✓ Coordinate internal teams, business users, and external vendors to translate operational requirements into practical and sustainable system solutions.
- ✓ Strong background in Oracle ERP, SQL/PLSQL, ETL, application integration, and enterprise system troubleshooting.
- ✓ Experienced in managing implementation activities from requirements and testing through Go-Live and post-implementation support.

Technical Writer (Freelance)

PT. Boga Inti, Jakarta, Indonesia (Sep 2024 – Present)

Achievement:

- ✓ Built and maintained a structured knowledge base using Confluence, reducing onboarding time for support teams by 30%.
- ✓ Authored over 40+ technical documents—such as SOPs, network topology guides, infrastructure runbooks, and system architecture overviews → significantly improving inter-team communication.

Key Profile:

- ✓ Collaborate remotely with IT teams and stakeholders to document infrastructure, cloud operations, and internal applications.
- ✓ Translate complex engineering tasks into user-friendly manuals, troubleshooting guides, and release notes.
- ✓ Use **Confluence** to manage living documentation, integrate diagrams (Lucidchart or Draw.io), and organize cross-functional documentation spaces.
- ✓ Standardized documentation practices across multiple departments & teams, resulting in greater clarity, consistency, and reduced dependency on verbal knowledge transfer.
- ✓ Ensure all documents align with ITIL practices and ISO documentation standards.
- ✓ Contribute to internal training materials, FAQs, and onboarding content for engineers, DevOps, and project managers.

Senior IT Supervisor

JVCKenwood Malaysia Sdn. Bhd., Johor Bahru, Johor, Malaysia (Jul 2023 to Jun 2024)

Achievement:

- ✓ Manage the implementation and maintenance of ERP systems, enhancing data accuracy and streamlining manufacturing processes, resulting in a 15% reduction in production delays.

Key Profile:

- ✓ Leading a team of 24 software engineers to execute a project for the development of a major software, complying with the agreed timeline, cost & quality.
- ✓ Further following the set of best practices and documented procedures for software testing, to improve accuracy & reliability of software products.
- ✓ Conducting a review of software requirements and providing necessary feedback so that the software meets the business requirements of the customer.
- ✓ Arranging resolution of errors/ issues for the software, identified root causes and proposed solutions to software issues.
- ✓ Provided organized assistance to all team members in completing tasks based on Jira milestones for reporting to top management both for Kenwood Malaysia and Kenwood Japan.

Representative IT Supervisor

PT. Giesecke & Devrient Indonesia, Jakarta, Indonesia (Sep 2018 to Jul 2023)

Achievement:

- ✓ Optimized existing Oracle Forms and Reports for performance, resulting in a 20% reduction in load times and improved user satisfaction.

Key Profile:

- ✓ Provided Support Service delivery for the daily routine IT activities in the organization, ensuring smooth IT operations.
- ✓ Led the team with 12 members, enabling them to create a new business model along with processes/steps to support the same to enhancing system stability and minimizing downtime.
- ✓ Directed the process-improvement focus groups, to achieve functional design (within user systems), as part of the business owner.
- ✓ Designed PL/SQL procedures, functions, and triggers to automate complex business processes and improve data accuracy.
- ✓ Coordinated support to the senior creative staff on day-to-day tasks while arranged documentation of all concerns/ incidents and reported them to Top Management in Toronto, Canada.
- ✓ Gained expertise in Information Technology, Technical Support delivery, Software Development, Active Directory, Databases and Linux/ SQL/ Java/ MS Excel.

IT Supervisor

Herbamed AG, Semarang, Indonesia (May 2013 to Sep 2018)

Achievement:

- ✓ Achieved an 85% reduction in cyber-attacks along with a reduction in manual tasks by 90%.

Key Profile:

- ✓ Led a team of 6 IT professionals to execute & complete a major IT project, complying with the agreed schedule and budget.
- ✓ Oversee daily IT operations for a manufacturing facility with 450 employees, ensuring seamless technology support and system availability
- ✓ Drove creating a new business model along with procedures/steps to support the same, turning constructive criticism into an opportunity for growth.
- ✓ Coordinated with the IT Team to implement the security software properly on all the Desktop computers of the team members.
- ✓ Collaborate with cross-functional teams to identify and resolve IT-related issues impacting production, leading to improved system performance and uptime.
- ✓ Arranged development of IT policies & procedures to improve the system security and data protection, resulting in a reduction of disruption of services.
- ✓ Provided technical support for manufacturing systems, resolving issues related to network connectivity, hardware malfunctions, and software applications for weekly update report to Manager & General Manager level.
- ✓ Conducted regular system maintenance and updates, ensuring optimal performance and security of IT infrastructure.
- ✓ Implemented an automated Asset Management System that enabled more efficient resource utilization.
- ✓ Gained expertise in Information Technology, Software Development, Active Directory, Databases and SQL/MS Excel.

EDUCATION

- ✓ **Bachelor of Science (BS)**, from Semarang University, Indonesia (Jan 2009 to Jan 2013) with **High Honors 3.86 from 4.0**
- ✓ **Diploma (Full-Stack Developer)**, from Wearness Education Centre, Semarang, Indonesia (Jan 2009 to Jan 2010)

KEY PROJECTS & INITIATIVES

- ✓ **Oracle E-Business Suite (EBS) ERP & Business Process Improvement**
Supported and analyzed enterprise business processes across Procurement, Inventory, Warehouse, Fixed Assets, Finance, and related applications, including system improvement and process optimization
- ✓ **Enterprise Application Development & System Migration**
Led software development and enterprise application initiatives, including Oracle EBS migration to an in-house enterprise system, database integration, Agile delivery, and coordination of multidisciplinary technical teams.
- ✓ **Manufacturing, Automation & Industrial IT Systems**
Managed and supported manufacturing IT, industrial automation, PLC, robotic systems, hardware, and software environments, integrating technical operations with business and production requirements.
- ✓ **Enterprise HRIS & Business Process Automation**
Supported HRIS implementation and enhancement and BPM workflow initiatives, covering requirements analysis, workflow design, testing, operational support, and cross-functional coordination.
- ✓ **IT Asset, Software Asset & Governance Management**
Implemented and developed ITAM and SAM processes, including asset inventory, lifecycle management, software compliance, governance, SOPs, and audit-readiness controls
